

How Nordea engages with this challenges

For Professionals Only

- We invest in businesses that offer climate solutions contributing to the transition to a low carbon sustainable economy, enhancing resource productivity while reducing pollution, waste and emissions

Alternative Energy

10%

Renewable Power
Solar
Wind

Resource Efficiency

75%

Energy Efficiency
Smart Grid
Eco-Mobility
Agro & Biofuels
Intelligent Construction
Advanced Materials

Environment Protection

15%

Clean Water & Air
Waste Management
Environmental Services

The percentages represent the current allocation between strategies as of 31.01.2015

Alternative Energy

“Eco-friendly and innovative technologies to generate cleaner energy”

Renewable Power

Focus on renewable electricity generation (biomass, fuel-cells, hydropower, waste-to-electricity, solar, wind)

Solar

Involved in the solar supply chain

Wind

Involved in the wind supply chain

For illustrative purposes only. Not necessarily the company logos displayed refer to current holdings.

Resource Efficiency

“Optimising the existing resource base and improving efficiency”

Energy Efficiency

Focus on energy efficient products and services

Smart Grid

Providing a modern, flexible utility grid

Eco-Mobility

Improving fuel efficiency, reducing emissions, building electrified vehicles

Agro & Biofuels

Providing solutions towards improving agricultural productivity

Intelligent Construction

Working towards improved building efficiency

Advanced Materials

Smart materials to help reduce environmental impacts and improve efficiencies

For illustrative purposes only. Not necessarily the company logos displayed refer to current holdings.

Environment Protection

“Protecting the environment and safeguarding the nature”

Clean Water & Air

Providing solutions to improve water and air quality or security

Waste Management

Involved in recycling and handling of waste

Environmental Services

Focus on environmental consulting or testing

For illustrative purposes only. Not necessarily the company logos displayed refer to current holdings.
